infrastructure
that works.

OVERVIEW

Wi-Fiber builds custom networks and installs proprietary smart platforms outfitted with optical and IoT sensors to capture and visualize data that clients can use to achieve lower costs, improve operational efficiency, and execute real-time outcomes.

WI-FIBER SMART PLATFORM

The modular lamphood can be customized to meet clients' exact specifications, allowing them to gather, aggregate, and visualize the data they want in real-time and correlate based on consumer needs.

SCALABLE, FUTURE-READY ARCHITECTURE THAT INTEGRATES WITH LEGACY HARDWARE AND OUT-OF-THE-BOX TECHNOLOGIES.
