

Public Safety Connect N' Protect Platform

Wi-Fiber is a S.M.A.R.T. network infrastructure provider. We custom build networks and outfit them with optical and IoT sensors that allow public safety entities to capture and visualize data to improve operational efficiency, execute real-time outcomes, and promote enhanced safety.

Next Generation Networking Speed

Your own private, 5G LTE capable network, custom-built by Wi-Fiber to fit your needs.

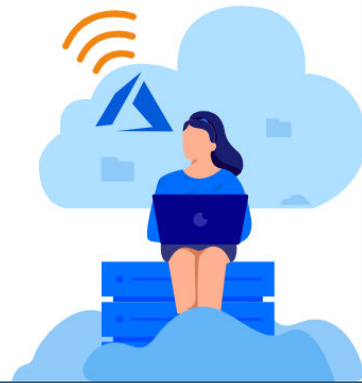

Full IoT and Edge Device Interoperability

Synchronize and aggregate data coming from network sensors seamlessly across devices.

Powered by Amazon & Microsoft

Wi-Fiber's low-latency network combined with the power of Amazon Web Service & Microsoft Azure's cloud computing technology, means you can process data from your network even faster and in real-time.

Connect N' Protect Capabilities

Gunshot Detection

4K Camera:

- Point to zoom
- Night vision
- Motion sense
- Infrared

wi-fiber

Wi-Fiber's custom-built network

- Unified Command Interface

wi-fiber

Real-Time Crime Center

- License Plate Reader
- Crowd analytics
- Integrated dispatch
- Private network with real-time A.I.

Smart lamphheads outfitted with optical and IoT sensors

In-Vehicle Connectivity & MDT Integration
